PROFESSIONAL SUMMARY

iOS Developer specializing in SwiftUI and MVVM architecture, with hands-on experience in SwiftData, CoreData, RESTful API integration, and asynchronous networking. Proven ability to build scalable, production-ready iOS applications using modern Apple frameworks and clean architecture principles.

Skills

Languages & Frameworks:

Swift, SwiftUI, Objective-C, iOS SDK

Architecture:

MVVM, Clean Architecture

Persistence:

SwiftData, CoreData

Networking:

RESTful APIs, URLSession, JSON Parsing

Tools:

Xcode, Git, Combine

Libraries:

SDWebImage, Kingfisher, CoreLocation, SFSafariViewController

Projects

AuthStream | Firebase, SwiftData

- **AuthStream** is a modern iOS application built with **SwiftUI** that delivers secure and seamless user authentication using **Firebase Authentication**.
- It enables users to sign up and sign in with email/password while managing credentials locally with a clean, native iOS experience.
- The app is designed with scalability and security in mind, leveraging Firebase for reliable auth flows and SwiftData for persistent storage.

Expense Tracker | SwiftUI, SwiftData

- Designed local persistence using SwiftData @Model for expense management
- Implemented type-safe data models for structured and reliable storage
- Enabled automatic UI updates through SwiftUI-SwiftData synchronization

NewsMatrix | SwiftUI, RestAPI, Combine

- Integrated RESTful API for real-time news delivery using asynchronous networking
- Implemented JSON decoding and error handling for robust data flow
- Enhanced user experience using AsyncImage and SFSafariViewController

Weather App | SwiftUI, MVVM

- Built real-time weather application using REST APIs and clean JSON decoding
- Implemented location-based updates using CoreLocation
- Designed modular UI components for scalability and maintainability

Education

Bachelor of Computer Applications (BCA) JECRC University, Jaipur | July 2023 – May 2026
